

PREFERRED ABRASIVES

Introducing 2 new Hi-Performance additions to our Hook & Loop offering:

- **Purple Ceramic Film (Grits 80-2000)**

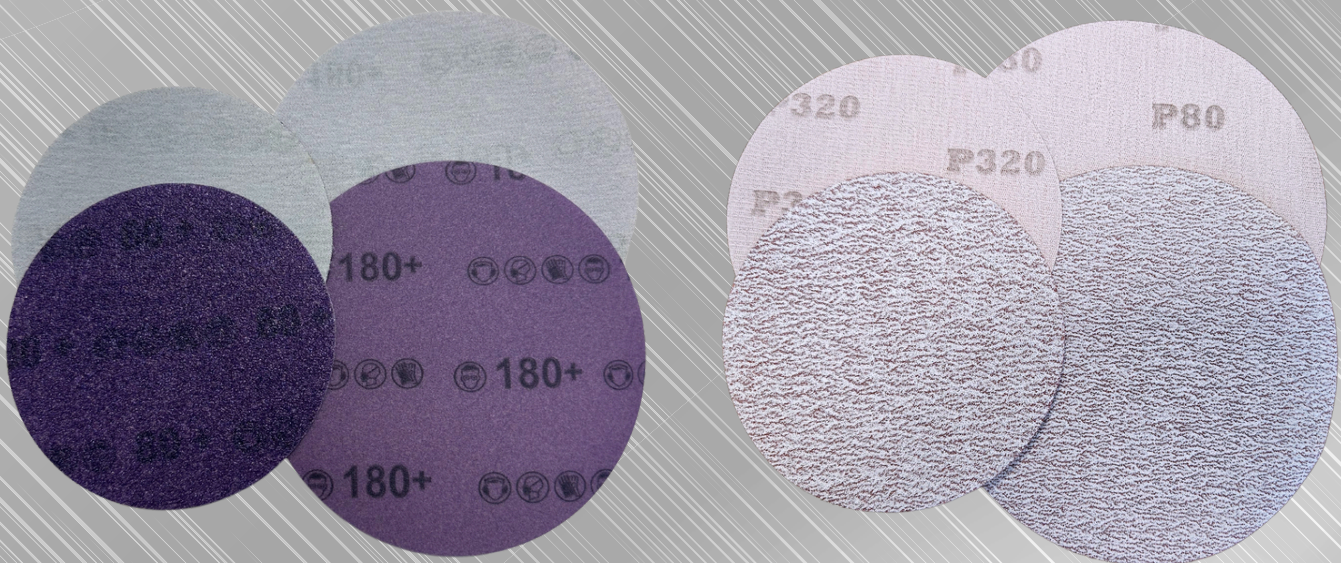

Hi-performance ceramic grain on a film backing provides longer life and a faster cut rate than aluminum oxide discs. The 4 mil polyester film provides greater tear resistance and edge retention.

Competes well against 3M 775L, Norton A995, A975, Q175, and other high performance film and paper discs.

- **Red Lube Premium A/O Paper (Grits 40-800)**

Premium heat treated aluminum oxide grain delivers superior life, fast cut rate & consistent finish over traditional Gold Paper discs. The B-wt. latex paper backing offers improved flexibility.

Competes well against Carborundum Premier Red and Norton A275.
